# PRODUCT

## ATTICO - 3010: (MANUAL/PLATFORM ELEVATOR)

For elderly or people with mobility issues, Attico 3010 eliminates the daily struggle and restriction that comes with having to deal with stairs. For them, and everyone else Attico 3010 mean freedom. It's easy to install and overcomes typical architectural barriers found while installing conventional residential lift system.

We offer platform elevator for wheelchair accessibility without the burden of transferring out your power chair, scooter and manual chair.

### **Accessibility**

Easy Transportation for differently able by offering bigger platform size in limited space.

### **Simplicity**

When it comes to installation, it fits easily into existing structure. And because it doesn't require building modifications so it's ideal for renovation projects as well as new construction with limited space. Plus, installing the platform lift won't force you to rewire your home because it runs on the same power as the other standard electrical appliances.

---

## TECHNICAL

**Drive:** The platform is moved by hydraulic cylinder, nominal speed 0.15 m/s and can go to 0.5m/s.

**Machine Roomless:** The system control equipment is placed in a small cabinet that can be located upto to 05mts from the hoistway.

**Hoistway Option:** When the concrete/masonry structure is not available, the lift can be installed on a steel structure covered with glass walls , ACP, with varnished steel panel.

**Capacity:** 04 to 13 passenger.

**Stop:** 02 to 07 floors.
